

Coin  
Oracle

# **Whitepaper**

September 2021 V2.0

# ***Abstract***

Nowadays, NFTs, tokens and games have started to emerge more confidently in the blockchain world. This whitepaper presents Coin Oracle, a platform designed to support great ideas to reach their potential, all on a secure and decentralized blockchain platform. We believe Coin Oracle will be the hub to develop new projects from start to finish or rely on specific services in order to grow the project and gain momentum. We argue that receiving a helping hand can save your project time, effort and money. All the while, ORA holders being able to benefit by earning rewards and increasing their ORAs' value. 

# Introduction

Given the fluidity and unpredictability with which the cryptocurrencies and the respective projects go, it's amazing to find stability for as many aspects of one's project as possible. Because the cryptocurrency boom has been largely unpredictable, with prices rising and falling dramatically and at the slightest provocation, it can be incredibly difficult to time the sale of such tokens. (1) There are several ingredients that all investors are looking for, both in the real world and in the crypto universe. Angel investors usually focus on a combination of strategy, product, market size and team to screen investments. (2) Key skills in the team's experience, the purpose of the project and ways for an investor to make a profit are all essential in order for a new project, token or business to reach its full potential.

Coin Oracle started out as a way to bring people with ideas closer to people with funds. This project later developed into Mind Shop, an NFT marketplace that sells everything from art to great ideas. It was during its development when we realized the true value and place that Coin Oracle should occupy in this crypto world.

# *Mission and Scope*

Our mission is to bring great ideas closer to reality by providing our expertise and services to people who need them most. It's a helping hand reached out in a world where everyone tries to win for themselves.

Coin Oracle is here to offer its support to bring your project into the crypto world. From art content to social media posts, to code and general advice, Coin Oracle is here to deliver all of them.

As an overview of our features:

**Development Services:** include separate services that range from general consultancy to specific uses, some of which being: Unity Development, Social media posts, web development, Whitepaper writing.

**The Incubator:** a complete package of services tailored to every projects' needs.

**Additional services:** Staking ORA, Investors' collectable NFTs, Venture Capital, and a Launchpad to further help projects grow, at the same time rewarding our holders.

# Use Cases

## Business help

You have a wonderful project idea, however lack the funding necessary to kickstart it. Banks, Credits, Crowdfunding and searching for angel investors has proven useless. You are not sure why it doesn't work since the idea behind it is great? Coin Oracle first offers consultation in order to understand your project fully and then offers a wide range of services designed specifically to your needs.

## Feasibility testing

Your project has taken its first few steps already, however investors are put out by the ambitious aims you set out. Use Coin Oracle to break down all the steps needed and show a feasible way to reach those goals. Take advantage of the other services Coin Oracle has to offer in order to reach those steps with ease.

## Crypto help

You are an entrepreneur however experienced, in real-world businesses and are interested in starting something in the realm of cryptocurrencies. Instead of making the same mistakes a lot of us did when we first began activating in this world, learn from us, take our expertise and save your funds for what really matters, avoiding obstacles and ultimately growing your successful businesses.

## Gaming in Crypto

Have experience in the gaming industry? Whether it's e-sports or friendly matches, all players understand the idea of risk, competition and ultimately want to win. This is exactly what it feels like for crypto traders. There have been several ways in which the gaming industry can benefit from the use of NFTs, accessing this new world filled with possibilities. Be a pioneer, reinvent the game!

## Launchpad

You have a small team of people and a great idea for a project. Bots always seem to get ahead of you in whitelists and it's been really difficult to find a way to reach investors. With Coin Oracle, even smaller projects will stand a chance to access funds safely.

# Features

## Incubator

Coin Oracle wishes to support new tokens, NFT marketplaces and other projects that have a great idea behind them. In this selfish world, we believe it's important to find the support you need in order to overcome the technical obstacles set out there. Which is exactly why we are here!

### Fees Redistribution

- 80% of each incubated project will go to developers.
- 20% of each incubated project will go to **ORA** holders.
- Allocation & airdrops to **ORA** holders.

### Description

This will be a package of services to help a project with all that is needed to bring it from where they are and all the way to completion. Here at Coin Oracle, we listen to your ideas, we help you see the big picture and perspective, we build together! A percentage from the new incubated project's token will be redirected to COIN ORACLE (buying ORA, burn & staking.)

Do you have a great idea for a token? Have you spotted a gap in the crypto market and know just what needs to fill that space? We know what it feels like to start something from scratch! We are here for you, ready to provide the management needed for your token venture to reach its full potential!

# Incubator brings benefits to **ORA** holders

- **Transaction fee redirected to burn and staking**  
Up to 1% of each transaction.
- **Development fee redirected to burn and staking**  
Up to 20% of each development fee.
- **Guaranteed allocation to incubated projects**

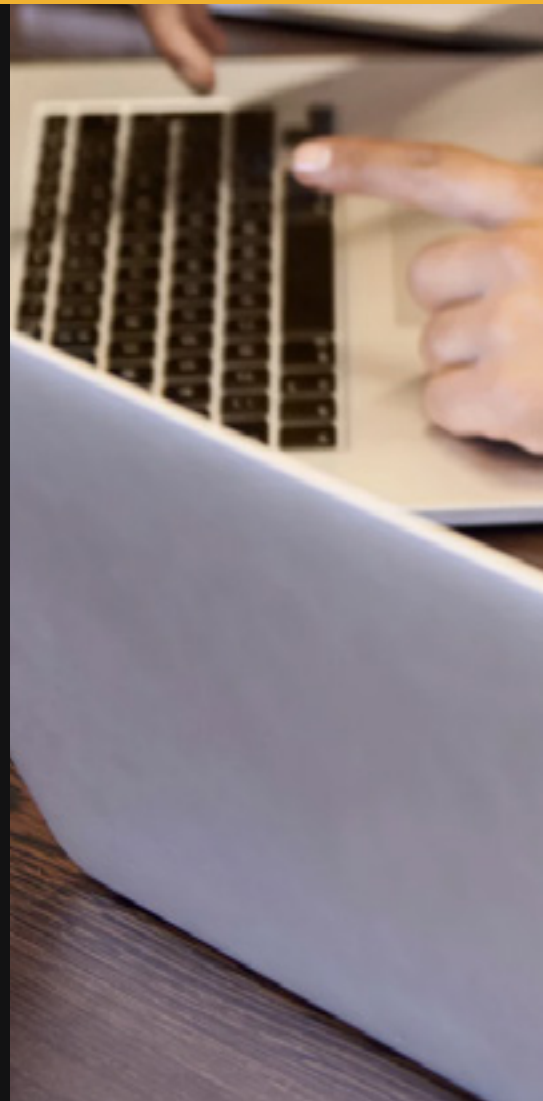

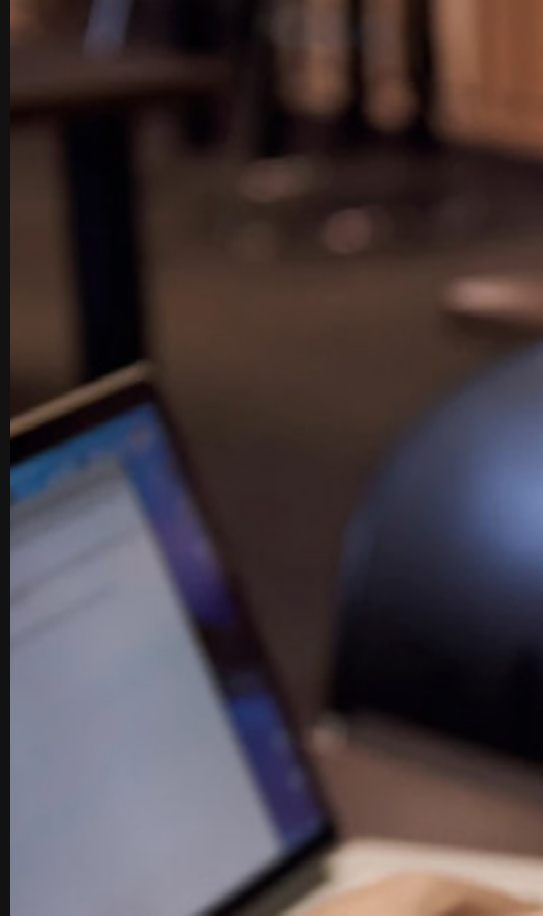

Further along the line, we will implement escrow, staking and communication improvements to raise interest and develop Coin Oracle further

## Services

Here at Coin Oracle, we aim to help develop your ideas and bring them closer to their potential. In order to do that, we need to understand your project needs which is why we created a general consultancy service.

### Fees Redistribution

- 80% of each service will go to developers.
- 20% of each service will go to **ORA** holders.
- Allocation & airdrops to **ORA** holders.

# Services

## **General consultancy**

Having a holistic view of the project, we can then suggest a number of steps to take in order to meet the goals your project is set out to reach.

## **Web design: frontend & backend**

The code behind any good website is what gives it a strong foundation. A flawless functioning website, from its core code to fully optimizing it, is the standard by which we work on all of our web designs. Our developers will work around the clock and will take care of both the front end and backend of the website.

## **Graphic design**

Visual is what sells in any market. Whether we are shopping online or in stores, the aspect of the product will be weighing heavily in your customers' decisions. Our team of highly experienced designers and artists will work together to bring your ideas to life in a way that combines together form and functionality, beauty and practicality. Every project is different and deserves its personality to show in order to stand out on the market.

## **UI/UX design**

The User Interface and User Experience are two aspects that polish any digital project, from websites to the gaming industry! Having a product that is intuitive and easy to use, a product that behaves exactly as your customer expects it to and makes the entire experience smooth and fluid is what separates mediocre services from excellence.

## **Whitepaper writing**

Staring at that white blank page in front of you can be daunting and with so many ways to express your thoughts, how do you know which is the best one to convey the right message? Our writers can help you write a cohesive, concise and fluid whitepaper in order to bring your ideas closer to your readers, to make it comprehensible and informative, without losing a touch of creativity.

This service extends to proofreading and editing existing material that you may have created for your project.

## **Roadmap structure**

The success of the project often relies on its sustainability. With this in mind, our project managers offer to build a roadmap structure for your project that will plot the steps needed to achieve your goals, keeping in mind time and financial constraints. The roadmap will be structured on feasible steps, thus ensuring the longevity of the project and generating trust among potential investors.

## **Token economics**

We live in a world governed by money, whether we are talking about traditional minted currencies or digital ones. This is why having an experienced team to help develop your token's economics and distribution can be vital for the growth of your project.

### **Deflationary smart contracts**

Having launched a number of projects already in the crypto market, our team of experts can help you gain access to an array of deflationary smart contracts that are used and tested by us.

### **DApp development**

Decentralized Apps have seen phenomenal growth in recent years, being addressed to a multitude of industries, from finance to gaming. Not relying on a centralized intermediary, the functions performed by DApps run smoother, faster, increase anonymity and often validate fairness. We work closely with several talented DApp developers that can create the smart contracts your business is looking for.

### **Game design document – GDD**

The gaming industry has very specific ways to approach projects. All good games however start out with a document that highlights the specifications of the game and all the features it provides. Helping investors understand the mechanics of the game, as well as a few pieces of concept art to go with it, will increase the odds of finding investors or publishers. Our partner studio has tens of projects sold to publishers and released on the market and they can help you design the appropriate document for your game, having in-depth insight into the industry.

### **Game and characters design**

From a game's genre, mechanics, heroes, UI/UX and all the way to the music that goes into the game, our partner studio can help you design the game you have been dreaming of. There are artists, project managers, developers and game psychologists ready to offer their expertise!

### **Unity development**

Mobile games and apps are often coded in Unity and the language that's used in Unity is called C# (pronounced C-sharp). Our skilled developers are here to help and with their knowledge and experience, anything is possible. Some famous titles created with Unity : Ori and the blind forest, City Skyline, Rust, and Hearthstone!

### **Marketing strategy & implementation**

We develop your marketing strategy, budget, and implementation with known contacts and provided by you. From our experience marketing takes a lot of time, effort and words, we always wished that someone would understand our goal and do it for us. Now we can do it for you!

### **Content creation**

Keeping the community engaged and growing it through valuable content is essential nowadays for any business. Coin Oracle can help you create content for various platforms from Medium to social media all in one service.

### **Voice Chat manager**

We have listened to many projects hindered by voices not capable of handling the crowd on Telegram's voice chat before or after the launch. We will study your project, understand it and provide a moderated and controlled environment.

## Services bring benefits to ORA holders

- **Development fee redirected to burn and staking**  
Up to 20% of each development fee.
- **Allocation to incubated projects**
- **Airdrops as tokens and NFT's**

# Special

## Staking Ora

Staking is a way of earning rewards for holding certain cryptocurrencies. In order to incentivise our holders we aim to increase its value. This will also encourage new investors to join ORA without the full risk of price dumping. Holding ORA will generate rewards, instead of being another cryptocurrency gathering dust in wallets.

## Investors NFTs

Tracking NFTs are a relatively new feature on the market, however we never heard anyone use them in this manner. They will be a limited edition NFTs - the value that you staked follows you as long as you have the NFT. You can use this NFT to earn passive income or sell it on the marketplace for a good price. These NFTs will have a limited life so use them wisely.

“Following” implies that holding such an NFT will redirect a percentage of all ORA transactions to the wallet of the NFT holder. In case the wallet changes, for example if you sell the NFT to another user, the percentage will be redirected to the new owner.

These can be bought directly on MIND.SHOP Marketplace or received from a lucky drop in a collectable MIND PACK.

## Fees Redistribution

- 60% of each NFT or PACK value will go to developers.
- 40% of each NFT or PACK value will go to **ORA** holders.

## NFTs bring benefits to **ORA** holders

- 3% of each NFT sold by a user will be redirected to burn and staking.
- 40% of each NFT sold by admin will be redirected to burn and staking.

## Escrow

Incubator services will benefit from Escrow where your funds will be safe until the service is provided giving our users a new level of security regarding their funds

## Launchpad Platform

Our Launchpad platform will be a decentralized ICO platform for the Binance Smart Chain Network.

Your project will be able to distribute tokens and raise liquidity. Wouldn't a launch without bots to occupy the whitelist spots be ideal?

This way even smaller projects will stand a chance to access funds safely without relying on chance to achieve their full potential.

## Launchpad brings benefits to **ORA** holders

- Allocation to incubated projects
- Airdrops as tokens and NFT's

## Mobile App

The mobile app will include the Wallet & portfolio. Another function of it will be the Wallet to wallet communication: Connect and chat with other wallets using your mobile device. Add your favourite coins and track their progress.

As Coin Oracle progresses, we will add more features such as:

Launchpad interaction – track new projects and signup for allocation and airdrops.

Venture capital interaction – track your investment revenue and real-time webcams

Staking interaction and revenue – track your staking and revenue

# Venture capital platform

Coin Oracle will connect cryptocurrency with real-life industries. Some of the largest capital expenditures are naturally those in capital-intensive industries. Whether we are talking about real estate, major manufacturing services or even retail.

Similar to staking, Venture capital investors will deposit funds which will be used to develop a project from its starting point to completion. Its timeline will be spread over more than one year and the maximum net profit margin will range between 15 and 20%.

# Methodology

- **Project consultation.**

The project team shall present the business idea and their general aims to Coin Oracle. We will present the services and what can be done to help the project move further.

- **Services acquired.**

The services that are chosen or the full package of services will be purchased and the work from our experts can begin.

- **Services performed**

The services will be completed by our teams of experts in each respective field. The entire collaboration will be closely monitored and managed in order to meet deadlines and expectations.

- **Project launch/presentation**

Once the services have been completed, Coin Oracle will promote the client's project on our website.

# Token Economics

**Total Supply**  
500,000,000 ORA

## Marketing

14,000,000 ORA | 2.8%

Distributed to early investors.

## Presale

250,000,000 ORA | 50%

## Team

21,000,000 ORA | 4.2%

Locked 6 Months

## PancakeSwap and DxSale Fees

5,000,000 ORA | 1%

## Public Sale

210,000,000 ORA | 42%

## Automatic LP

3% of each transaction contributes towards automatically generating liquidity locked inside PancakeSwap LP.

## Earn Passive Income

3% of each transaction is distributed to the holders automatically.

## Marketing & Team

3% of each transaction is converted to BNB and used for marketing and development.

# Roadmap

## Coin Oracle Roadmap V2

### **Q3 - AUGUST 2021**

- Website Design Update and Functionality version 2.0
- Whitepaper version 2.0
- Developing first incubator project - MIND.SHOP

### **Q4 - SEPTEMBER 2021**

- Incubator - open for business

This will be a package of services to help a project with all that is needed to bring it from where they are and all the way to completion. Here at Coin Oracle, we listen to your ideas, we help you see the big picture and perspective, we build together!

- Services - open for business

Here at Coin Oracle, we aim to help develop your ideas and bring them closer to their potential. In order to do just that, we need to understand your project needs which is why we created a general consultancy service.

## **Q4 - OCTOBER 2021 - DECEMBER 2021**

- **Website incubator chat application**

Creating wallet interaction between the service provider and the buyer, all while respecting your privacy.

- **Introducing ESCROW for Incubator services**

Your funds will be safe until the service is provided giving our users a new level of security regarding their funds.

- **DApp - Introducing ORA Staking**

Staking will make ORA a rarer asset thus increasing its price, encouraging new investors and retaining holders.

- **DApp - Introducing COIN ORACLE INVESTORS NFT's**

Limited edition NFTs.

A tracking NFT will redirect a % of all transactions made with ORA and will redirect them to the NFT holder wallet.

You can use this NFT to earn passive income or sell it on the marketplace for a good price. These NFTs will have a limited life so use them wisely.

## **Q1& Q2 - 2022**

- **Introducing mobile app Wallet & portfolio**

Wallet to wallet communication: Connect and chat with other wallets using your mobile device. Add your favourite coins and track their progress.

- **Introducing Launchpad platform**

This way even smaller projects will stand a chance to access funds safely without relying on chance to achieve their full potential.

- **Introducing venture capital platform**

Connecting cryptocurrencies to real-life industries. Similar to staking, it will run over the course of 1 year +, investors will deposit funds in a wallet used to develop a project in full. The maximum profit will be between 15-20%.

- **Mobile app updated**

Launchpad interaction – track new projects and signup for allocation and airdrops.

Venture capital interaction – track your investment revenue and real-time webcams

Staking interaction and revenue – track your staking and revenue

# *Conclusion*

Our platform and services aim to bring a helping hand to this everchanging world where new ideas keep emerging and they need support to move forward. From the stage of ideas and all the way to staggering success, Coin Oracle is here to bring expert advice and hands-on assistance to the projects that need it.

Instead of investing funds in a trial and error manner, we believe, it's best to rely on the experience of others who have already faced, and conquered such obstacles. All the while, Coin Oracle is here to support our investors and holders by attributing a percentage of all fees and earnings to them, thus ensuring the longevity of our platform.

***To great ideas and successful projects!***
